

PRESS RELEASE

Salzburg, 08. August 2019

PALFINGER obtains major order for wpd's Yunlin Offshore Wind Farm

PALFINGER and Yunneng Wind Power Co., Ltd. have signed a contract to deliver 81 PF12000-4.6 LDB (lay-down boom) cranes for the Taiwanese wpd's Yunlin Offshore Wind Farm.

As a full-service provider, PALFINGER MARINE has secured an order for 80+1 cranes for the next upcoming major commercial wind power project off the Taiwanese coast.

wpd's Yunlin Offshore Wind Farm consists of 80 turbines and has a project capacity of 640 MW. Each turbine platform will be equipped with one fixed boom crane, which has an outreach of 4.6 metres and a lifting capacity of 1 ton. Additionally, one crane will be installed onshore for training purposes.

The latest generation of the PALFINGER PF type transition piece crane series sets new standards for maintenance and safety. As long as the crane is serviced regularly, no spare parts will be needed if the crane is used for typical offshore wind applications for around two years.

All components meet corrosion class ISO 12944-9 category CX and all electrical components that will be staying outside permanently comply with a protection class of at least IP 66. The customarily high safety standard at PALFINGER has been verified and confirmed by DNV GL.

PALFINGER is the market leader in offshore wind service cranes in Taiwan

PALFINGER is currently the leading supplier to the Taiwanese offshore wind market with an amount of 145 cranes in total. Combined with the recently established local service set-up, PALFINGER is the partner for enabling all power supply companies to meet the set target of 5.5 GW by 2025.

About PALFINGER MARINE

As a global partner for innovative and reliable deck equipment and lifesaving appliances, PALFINGER MARINE supplies high-quality products to fulfil standardised and customised demands. Supported worldwide by a network of experienced and skilled specialists, we provide flexible and efficient service solutions. Our portfolio gives a competitive edge to customers in the maritime and offshore industry.

About PALFINGER AG

For many years PALFINGER has been one of the world's leading manufacturers of innovative lifting solutions for use on commercial vehicles and in the maritime field. As a multinational group headquartered in Bergheim, Austria, the PALFINGER Group, which has approximately 11,000 employees, generated total sales of around EUR 1,616 billion in 2018.

The Group has manufacturing and assembly facilities in Europe, CIS, North and South America, as well as Asia. The pillars of its corporate strategy are innovation, internationalisation, enhanced flexibility of products, services and processes, and PALFINGER 21st (the development of smart solutions and innovative, data-based business models). PALFINGER is regarded not only as the market leader, but also the technology leader in the global market for hydraulic loader cranes. With a network of more than 5,000 sales and service centres located in over 130 countries across all continents, PALFINGER is always in proximity to its customers.
