

## PRESS RELEASE

Salzburg, Austria on August 22, 2024

### **PALFINGER MARINE: Next Level Solutions at SMM 2024**

*As a global partner for pioneering and reliable deck equipment and lifesaving appliances, PALFINGER MARINE will be showcasing new product developments at this year's SMM trade fair in Hamburg from September 3 to 6. Highlighting its PFM 2100 and PK 25.001 M cranes, as well as the new totally enclosed lifeboat (TELB) series, the company will be presenting its latest products. These innovations underscore PALFINGER MARINE's commitment to the advancement of technology in the marine industry.*

PALFINGER MARINE is proud to present its new and innovative solutions at this year's SMM in Hamburg, the world's leading maritime trade shows. For PALFINGER MARINE, the SMM is the highlight of the entire marine exhibition season and a place to showcase cutting-edge solutions and connect with other industry leaders.

#### **Presenting the PFM 2100: a new era of heavy-duty cranes**

Among PALFINGER MARINE's core product highlights this year is the launch of the PFM 2100, the company's first heavy-duty foldable knuckle boom crane featuring PALFINGER's patented P-profile. Designed for service and workboats as well as the aquaculture industry, the PFM 2100 features an impressive nine boom extension. The high lifting capacity of more than 4,000 kilograms at a maximum outreach of 29 meters is a significant advantage over other solutions available on the market.

Visitors to PALFINGER MARINE's booth also have the chance to explore the PK 25.001 M, a fully foldable knuckle boom crane that represents the fifth and latest redesign of the PK slewing cylinder generation. This CE-compliant model features significant improvements, including optimized lifting geometry, offering enhanced performance for various applications. In addition, PALFINGER MARINE

is introducing its new P-TELB series of fully enclosed lifeboats with an innovative double-deck seating arrangement. It maximizes the number of individuals the lifeboat can carry relative to its length, allowing up to 150 passengers across four different boat lengths and highlighting PALFINGER MARINE's commitment to safety and efficiency.

### **Showcasing innovation and building partnerships**

“With advanced technologies and an international service network, PALFINGER MARINE makes a valuable contribution to the marine industry, which we will be showcasing at the SMM – the place where the world's most important players come together,” says Klaus Schreiber, Vice President Sales & Service at PALFINGER MARINE. “This year's SMM trade fair is even more special for us, as we are introducing some exciting product highlights to the public for the first time. Our booth will be an open meeting zone giving visitors the opportunity to exchange ideas with our PALFINGER experts. We invite everyone to visit our stand A1.422, experience our state-of-the-art technology up close, and shape the future of the maritime industry together with PALFINGER MARINE.”
